

Automated Children and Youth Solution Case Management Solutions

Created by social workers for social workers.

With premier integration with Child Welfare Information Solution (CWIS), the Automated Children and Youth Solution (ACYS) does all of this and more!

From referrals to provider payments, ACYS is an innovative, comprehensive solution that uses streamlined processes to ensure that the focus of case management is always about our children. Developed in partnership with Pennsylvania counties, ACYS is an economical decision, as you only pay for migration and annual support costs.

The logo for ACYS, with the letters A, C, Y, and S in red, blue, green, and orange respectively, and a stylized 'e' in orange.

Child welfare expertise is critical to solution development, and with **more than 24 years** of human services experience, Info-Matrix designed ACYS with the end-user in mind. ACYS manages all aspects of child welfare and our subject matter experts help counties proactively plan for the future of policy impacts

You deserve a case management system that works for you.

- Spend less time on documentation and more time working with families
- Directly interface with CWIS to improve outcome acceptance rates
- Organize referrals, case management, and fiscal capabilities in one place
- Ensure data integrity and complete ownership of data
- Stay up-to-date on the latest policy changes

INFO-MATRIX CORPORATION

RESULTS THAT FOCUS ON OUR CHILDREN

ACYS ensures that the most accurate data is being submitted to CWIS. This reduces the number of rejected referrals and provides caseworkers more time to be in the field. Administration now has the ability to run ad hoc queries and create their own reports.

“ ACYS is the premiere Child & Youth Case Management Application.

-Pennsylvania Office of Children and Youth

THE PROBLEM

Lackawanna County was previously using a case management system with an inefficient validation process, slowing communication with CWIS. The county also did not have access to its own data for creating ad hoc reports and queries.

To address these needs, the county adopted the ACYS solution which substantially decreased their number of rejected referrals. Info-Matrix partnered with the ACYS counties to identify the transmission issues and create a solution that would meet all state and county outcome requirements. The implementation was completed in 12 weeks, followed by 2 weeks of end-user training and allowed them full access to their data.

OUR SOLUTION

PROJECT FEATURES

- Improve Service Quality
- Comprehensive Reporting
- Data Integrity
- System Integration
- Support & Training
- Built-In Validations
- Pre-Filled Docushare
- Referral Organization
- Multiple Search Functionality
- Automated System Notifications
- More Focus on Children
- User Specific Notification
- Pre-Filled Forms and Letters
- Worker Specific Caseload
- Mobility Access
- Automated Reports
- AFCARS Reporting
- 1-Click FY Roll Over
- IV-E Billing & Reports
- Vendor Invoicing
