BUSINESS DATA ANALYTICS

Maximize the power of your information.

Data-based decisions have the most impact on business outcomes. But with the flood of data that is available, organizations struggle to manage and understand their information. To optimize information and turn data into innovations, business intelligence and data analytics enable companies to make informed, insightful and proactive decisions. Our full-service analytics solutions identify patterns and use interactive dashboards to provide actionable data that drives performance improvements.

Ask the right questions. Integrate the right data. Produce valuable intelligence.

Our **data-centric, outcome-driven** approach provides the agility and customization required to meet your specific needs. Our methodology allows you to extract the right information at the right time to gain **valuable insights** quickly, even when analyzing complex data structures.

Your business moves fast.

Your intelligence can be faster.

Data Integration: Quickly manage data from multiple sources, systems and owners to bring all of your insights into a manageable view.

Reporting & Notification Automation: Generate insights and intelligent reports to detect anomalies and notify you of changes across critical business KPIs.

Governance & Control: Confirm data quality by ensuring accuracy and completeness of the information that you manage, and control accessibility of your data.

Technology Agnostic: Rapidly deploy the right data analytics technologies to create your Business Intelligence Road Map.

Data Visualization: Optimize the way your content is packaged, displayed and accessed using interactive dashboards with custom graphics.

Advanced Insight: Generate your most statistically relevant findings based on an intuitive analytics platform using machine learning technology.

Diagnostic Root Cause Analysis

Interactive dashboards help you to drill-down into the detail behind your raw data. Gain more insight and answer questions that you won't get with basic reports.

Predictive Trend Analysis

Data Visualization allows you to identify patterns early on, plan remediation and enable future insights. Use historical data and analytics to evaluate program effectiveness and examine probability of outcomes.

Descriptive Reporting Automation

Status updates and manual reporting takes time away from resource performance. Automate these reports and present data in a usable manner to help you gain insights into past performance.

Real-Time Data Visualization

Use dashboards to view your KPIs in real time to see performance indicators such as utilization and resource capacity. Dashboards also help you identify performance gaps and development needs. You can even receive automated alerts for data anomalies to be immediately addressed.

ABOUT INFO-MATRIX

Info-Matrix Corporation is a small, woman-owned technology consulting firm located in Camp Hill, PA. Recognized as one of the 2019 50 Fastest Growing Companies in PA, Info-Matrix has been providing professional services to the both the private and public sectors for more than 23 years.
