AFCARS Insights

Number of Termination of Parental Rights

Spending Based on the Number of Children

Length of Time from the Termination of Parental Rights to Adoption

Average Spent by Age and Gender

SIMPLE...EASY...FAST!

AFCARS Insights Analytics Dashboard

The AFCARS Insights Analytics Dashboard provides users with dynamic data visualization tools that can be configured to meet practice needs. From looking at the demographics of children in care to improving the time from TPR until adoption to examining trends in disproportionality, the analytics dashboards are built with practitioners in mind. AFCARS Insights Dashboards also provide an innovative way to monitor trends and give insights that inform budgeting for future needs.

Upload previous submissions to look at trends over time right now without investing in more technology! AFCARS Insights provides the tools necessary to improve the permanency outcomes for children and stay within your agency budget.

Key Features

- Easy error reporting for both foster care and adoption data
- Displays data in a meaningful, informative way
- Upload previous submissions NOW
- Ensures accurate and complete AFCARS submissions
- Easy-to-upload functionality
- Visualizations can be saved as .pdf, .png, .jpg, and .svg formats
- Dynamic functionality for many parameters

Contact Andrea Richardson to schedule a demonstration: arichardson@info-matrix.com

“ AFCARS Insights works wonderfully! I used the tool in preparation for my entire AFCARS submission. Agencies should jump at the change to use it!

-Kim, Data Manager

“ AFCARS Insights finally gave us a way to live by the stats. Data Based Decision Making is now how we practice.

-Lori, Program Director
